Nom: ..... Prénom: ..... Classe: ..... N°: .....

*Le sujet comporte 4 pages*

**A. READING COMPREHENSION: (15 marks)**

The text:

1. David Balogun, a nine-year-old boy from Pennsylvania, U.S, loves science and computer programming. He has recently received a diploma from Reach Cyber Charter School after he took online classes from his family home. David becomes one of the youngest children to graduate high school. Michael Kearney is the only person younger than David who did the same. He still holds the Guinness world record he set when he was six.
2. David wants to be an astrophysicist. Although his parents have university degrees, they said that it is challenging to raise a gifted child. "He's a nine-year-old boy with the brain that has the capacity to understand a lot of theories and ideas beyond his years and sometimes beyond our understanding," David's mother said.
3. "My teachers helped keep me engaged with my studies. They didn't bog me down. They kept saying: 'you can do this'. This pushed me to keep progressing," said David. Some teachers said that they learned from him. They even considered him a computer programmer. "David was an inspirational kid. He has changed the way my colleagues and I think about our job," Cody Derr, his teacher, said.
4. David is now a member of the Mensa, an organization of individuals with high intelligence quotients. He has done one semester at Bucks county community college since graduating from Reach charter. Meanwhile, he and his parents have been doing their research into other colleges. They try to find one that is best suited for him. Besides his academics, David enjoys doing sport and playing the piano.
